Subpart—Grade and Size Regulation

§916.356 California Nectarine Grade and Size Regulation.

(a) During the period beginning April 1 and ending October 31, no handler shall ship:

(1) Any lot or package or container of any variety of nectarines unless such nectarines meet the requirements of U.S. No. 1 grade: *Provided*, That nectarines 2 inches in diameter or smaller, shall not have fairly light-colored, fairly smooth scars which exceed an aggregate area of a circle $\frac{3}{8}$ inch in diameter, and nectarines larger than 2 inches in diameter shall not have fairly light-colored, fairly smooth scars which exceed an aggregate area of a circle $\frac{1}{2}$ inch in diameter: *Provided further*, That an additional tolerance of 25 percent shall be permitted for fruit that is not well formed but not badly misshapen: *Provided further*, That all varieties of nectarines which fail to meet the U.S. No. 1 grade only on account of lack of blush or red color due to varietal characteristics shall be considered as meeting the requirements of this subpart: *Provided further*, That during the period April 1 through October 31, 2003, any handler may handle nectarines if such nectarines meet "CA Utility" quality requirements. The term "CA Utility" means that not more than 40 percent of the nectarines in any container meet or exceed the requirements of the U.S. No. 1 grade, except that when more than 30 percent of the nectarines in any container meet or exceed the requirements of the U.S. No. 1 grade, the additional 10 percent shall have non-scoreable blemishes as determined when applying the U.S. Standards for Grades of Nectarines; and that such nectarines are mature and are:

(i) Free from insect injury which has penetrated or damaged the flesh; split pits which cause an unhealed crack or one or more well healed cracks which, either singly or in the aggregate, are more than $\frac{3}{8}$ inch in length; mold, brown rot, and decay which has affected the edible portion; and

(ii) Free from serious damage due to skin breaks, cuts, growth cracks, bruises, or other causes. Damage to any nectarine is serious when it causes a waste of 10 percent or more, by volume, of the individual nectarine.

(iii) *Tolerances*. Not more than 10 percent, by count, of the nectarines in any one container may be below the requirements which are prescribed by this paragraph, including not more than 5 percent, by count, for any one

defect, except split pits. An additional tolerance of 10 percent, by count, of the nectarines in any one container or bulk lot may contain nectarines affected with split pits. This means a total tolerance of 20 percent is allowed for all defects, including split pits, but not to exceed 15 percent for split pits alone.

(iv) The Federal or Federal-State Inspection Service shall make final determinations on maturity through the use of color guides or such other tests as determined appropriate by the inspection agency. The Federal or Federal-State Inspection Service will use the maturity guides listed in table 1 to paragraph (a)(1)(iv) in making maturity determinations for the specified varieties when inspecting to the "well matured" level of maturity. For these varieties, not less than 90 percent of any lot shall meet the color guide established for the variety, and an aggregate area of not less than 90 percent of the fruit surface shall meet the color guide established for the variety, except that for the Tom Grand variety of nectarines, not less than an aggregate area of 80 percent of the fruit surface shall meet the color guide established for the variety. For varieties not listed, the Federal or Federal-State Inspection Service will use such tests as it deems proper. A variance for any variety from the application of the maturity guides specified in table 1 to paragraph (a)(1)(iv) may be granted during the season to reflect changes in crop, weather, or other conditions that would make the specified guides an inappropriate measure of "well matured."

A sample consisting of one-half of the number of fruit specified for a 16-pound sample for a particular size category shall be used, provided such sample weighs at least eight pounds. When one-half the specified number of fruit in a sample results in a number ending with one-half a fruit,

the smaller full number of fruit shall be used to determine the sample weight. If a sample fails with respect to minimum size requirements on the basis of an 8-pound sample, a 16-pound sample shall be used to determine if the fruit meets the minimum size requirements.

(c) *Container tolerances.* The contents of individual packages in the lot are subject to the following limitations, provided the averages for the entire lot are within the tolerances specified in this part:

(1) For packages which contain more than 10 pounds, and a tolerance of 10 percent or more is provided, individual packages shall have not more than one and one-half times the tolerance specified. For packages which contain more than 10 pounds and a tolerance of less than 10 percent is provided, individual packages shall have not more than double the tolerance specified.

(2) For packages which contain 10 pounds or less, individual packages are not restricted as to the percentages of defects.

(d) As used herein, *U.S. No. 1, mature*, and *standard pack*, mean the same as defined in the United States Standards for Grades of Nectarines [7 CFR 51.3145 through 51.3160]; and *No. 22D standard lug box* means the same as defined in section 1380.19 (17) of the “Regulations of the California Department of Food and Agriculture”. *Well matured* means a condition distinctly more advanced than *mature*.
